

Jacqui Flynn, Vice President, Resource & Business Development

Jacqui joined HopePHL (pronounced “Hopeful”, formerly known as “People’s Emergency Center/PEC”), in January 2020, with over 15 years of experience fundraising for a variety of non-profit missions, and a proven track record of success, including providing oversight and tactical execution across multiple Development and Communication verticals, and leading teams to secure over \$50M in revenue over the course of her fundraising career.

During her time at HopePHL she has grown the capacity of the Development and Communications team leading them to sustain an increase in contributed revenue by 30% annually, diversifying revenue, and supporting the merger of PEC and Youth Service, Inc. (YSI). Her team secured significant financial resources that supported both organizations over a three- year affiliation period and provided oversight and process design leadership to identify a unique and memorable new brand for the new organization.

She is most HopePHL for the potential to serve as your philanthropic partner, closing gaps in Philadelphia’s social-safety net, and providing more life-changing outcomes for children, youth and families in need.

Jacqui finds work-life balance by riding her bike, hiking, cooking, and spending time with family.
